 - Moving Foliage
 - Birds & Small Animals

Dependable Outdoor Protection

Nuisance alarms can cost thousands of dollars in service costs and false alarm fines, not to mention the lack of response from law enforcement to security systems proven to be unreliable.

Not all motion sensors are created equal.

PROTECH has the experience and technology for false-alarm-free performance. Our sensors have been proven in hundreds of utility substations nationwide and are considered by many security professionals to be the only outdoor motion sensors that really work!
