

**Do you have a  
perimeter security intrusion  
detection problem?**

## **CONSIDER PROTECH'S ADVANTAGES**

- ✓ **Understanding of the regulatory requirements of the NRC as it relates to perimeter protection at nuclear facilities**
- ✓ **Systems are tested and approved by Sandia Laboratories, DOE and the US Air Force**
- ✓ **Over 25 years of perimeter intrusion sensor application experience**
- ✓ **Background and experience in physical security solutions for the nuclear market**
- ✓ **Innovative technologies unmatched by competition**

# Solutions Unique to the Industry

- ✓ Meet NRC regulation standards.
- ✓ Combine multiple technology sensors for higher performance.
- ✓ Easy to install, service and maintain sensors.
- ✓ More cost-effective than other systems.
- ✓ Solar and wireless products require no infrastructure for owner controlled areas.
- ✓ Highly reliable - minimal false alarms.
- ✓ Lowest Total Cost of Ownership in the industry.

Working as your partner, Protech will provide designs, products and technologies to ensure your perimeter security is never compromised.

## SERVICE

We are a US manufacturer and offer a Service and Support team that is quick to respond and offers flexible training programs.

## TECHNOLOGIES

- ✓ Fence-mounted intrusion detection systems with key advantages over older solutions.
- ✓ Active Infrared Barriers combined with multiple volumetric microwave sensors.
- ✓ Dual Technology Military Grade Sensors – Pyramid is the only one in its class.

## LET'S TALK

Contact us for **technical information** or a site visit to discuss your requirements, without obligation.
