

PROTECH NEWS

Welcome to our third issue of PROTECH NEWS.

In response to feedback, this issue spotlights G-FENCE - Fence-Mounted Intrusion Detection and explains how all fence-mounted intrusion detection systems are **NOT** the same. Plus...additional news and upcoming events.

G-FENCE - Fence-Mounted Intrusion Detection

PROTECH is proud of its patented protected, one-of-a-kind technology in G-FENCE (wired and solar-powered models) whereby sensing happens in the accelerometer NOT the cable like our competitors.

Why is this important?

- Improperly installed cable (by competing systems) causes false alarms since sensing depends on very precise cable installation (fiber / microphonic technologies). With sensing in the accelerometer (instead of the cable) this issue goes away.
- PROTECH's 'cable' carries simple 4-wire conductors for communications, not intelligent sensing.
- Accelerometer sensing gives a higher probability of detection and lower false alarm rates because of its robust protection in the housing.
- Sensing is based on x-y-z axis (just like your smart phone) so for example, when the wind is causing high movement on the fence, alarms do not occur because the sensor knows everything is moving in one direction (x-axis) so it doesn't alarm.

G-FENCE features:

- Zoning
- Precise localization of the cut, climb or lift of the fence
- Integrates with major VMS providers
- Huge range of sensitivity settings (by individual accelerometer)
- Every sensor is integrated along the cable so intelligence is distributed along the entire length
- Cable resistant to bending
- Up to 1000 event log history
- Cost effective compared to competition
- Solar-powered and wired versions

PROTECH'S SOLARIS Active IR Beam Wins Award

Solaris, PROTECH's solar-powered active infrared beam won a Gold Award in Best Perimeter Protection Technology during the AST Awards event. [Read more here](#).

G-FENCE is a nominee in the upcoming AST Awards event. With its patented technology and superior performance along with being the only fence-mounted security system of its kind in the world, we hope to be receiving accolades soon! Wish us luck!

PROTECH-VIDEOWAVE (Canadian office) Participates in O'Cannabiz Exhibition this Month

Protech is working in a new market - in Canada several projects have involved

the deployment of Protech-

Videowave technologies at Cannabis Grow Operations and Farms.

The Canadian team will be at Booth 533 at the upcoming exhibition at the Toronto International Center - June 8-9.
